Co-winner counts over 100 independent paths: width epsilon=1e-08, coefficient L1 epsilon=0.01
+1 per qualifier on each path; cap 2000, patience 200
Absolute steps
Diameter-normalized steps
Initial step gamma_0
Scale c
Half-life H
Width co-winner count W (higher is better)
Highest width count per step rule (W)
Highest coefficient L1 count per step rule (L1)
