Best schedule in the common grid | selection uses the original width only
Earlier random direction
Sphere: gamma0=0.03, beta=0.99
Euclidean phi: gamma0=0.3, beta=0.999
Best width minus global reference
Evaluated iteration
Earlier random direction
Coefficient error of best-width state
Evaluated iteration
Zero coefficients
Sphere: gamma0=0.003, beta=0.995
Euclidean phi: gamma0=0.003, beta=0.995
Best width minus global reference
Evaluated iteration
Zero coefficients
Coefficient error of best-width state
Evaluated iteration
