Best grid pair: gamma_0 = 0.1, beta = 0.9 | achieved width = 1.86295244
Same AR(3) path and start | 415 evaluated directions | stop: patience
Complete recorded run for the selected pair
Empirical width
Current width
Best recorded width
Global empirical minimum: 1.74761156
Last recorded improvement
Iteration t (0 = initial direction)
Remaining optimization gap (log scale)
Best width minus global minimum
Iteration t
Actual steps: $\gamma_t = 0.1\,(0.9)^t$
γ_t (log scale)
Iteration t
