AR(3): coefficient norms from four estimators
Linear sample-size axis
Logarithmic sample-size axis
Euclidean coefficient norm
Sample size T
Gradient descent $\|\widehat{\phi}_T\|_2$ $(k=4)$
Yule-Walker $\|\widehat{\phi}_T^{\mathrm{YW}}\|_2$
Conditional QML $\|\widehat{\phi}_T^{\mathrm{CQML}}\|_2$
Horváth L^∞ LP $\|\widehat{\phi}_T\|_2$
True $\|\phi\|_2 = 0.7$
