AR(3): paired RMSE over 100 independent paths (95% Monte Carlo bands)
Coefficient RMSE versus sample size
Log-log view of convergence speed
Gradient descent
Yule-Walker
Conditional QML
Horváth L^∞ LP
$T^{-1/2}$ comparison
T^{-1} comparison
Coefficient RMSE $\sqrt{R^{-1}\sum_r \|\widehat{\phi}_T^{(r)} - \phi\|_2^2}$
