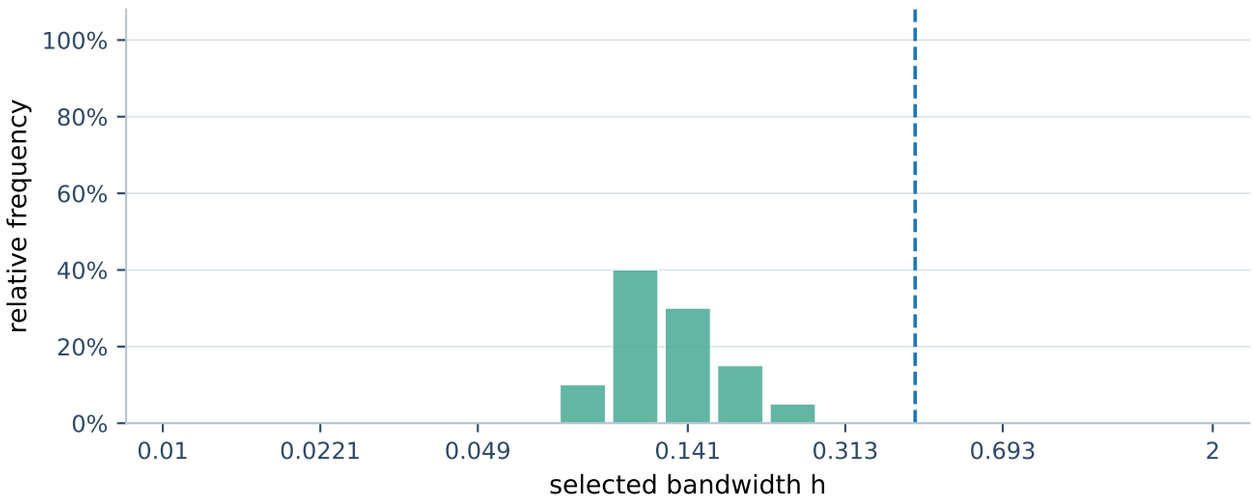
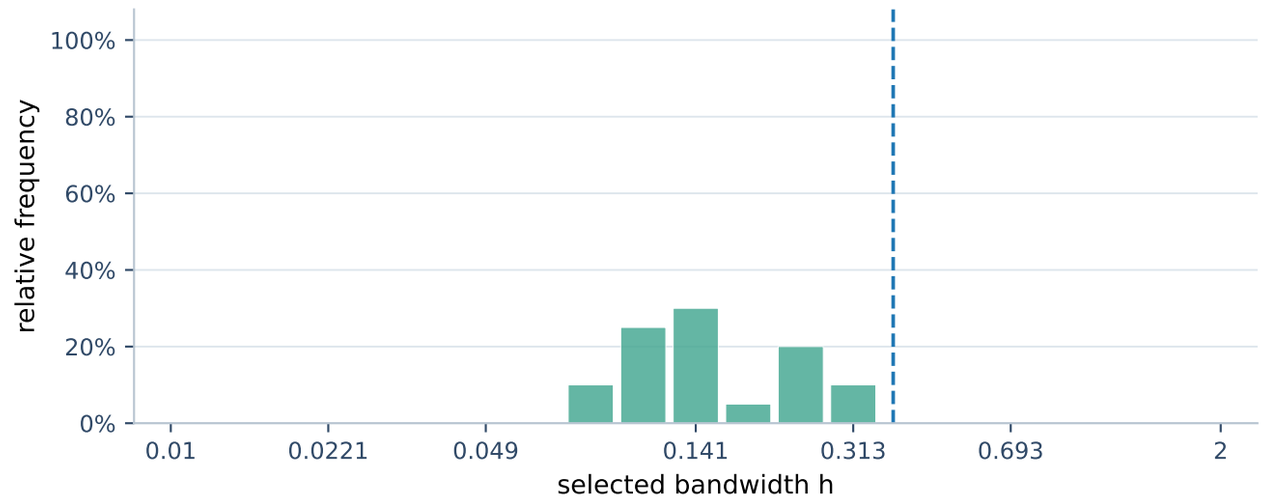
H^2 spectral bandwidth distributions for increasing sample size
Gaussian data; $M = 20$ per n, $N = 21$, $S = \exp(-\lambda H^2)$, $\lambda = 1$ (preview)

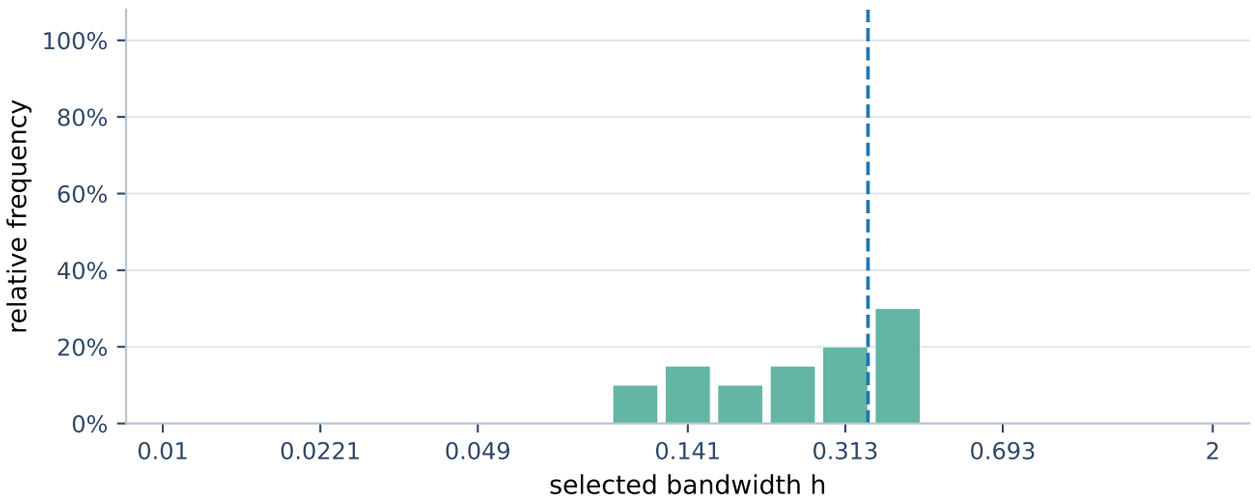
$n = 100$



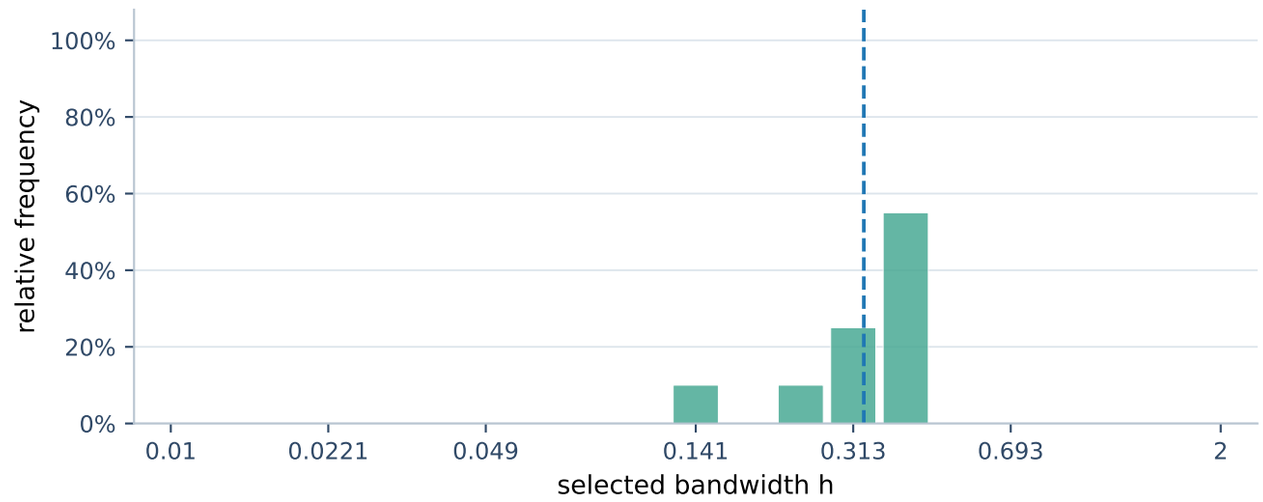
$n = 200$



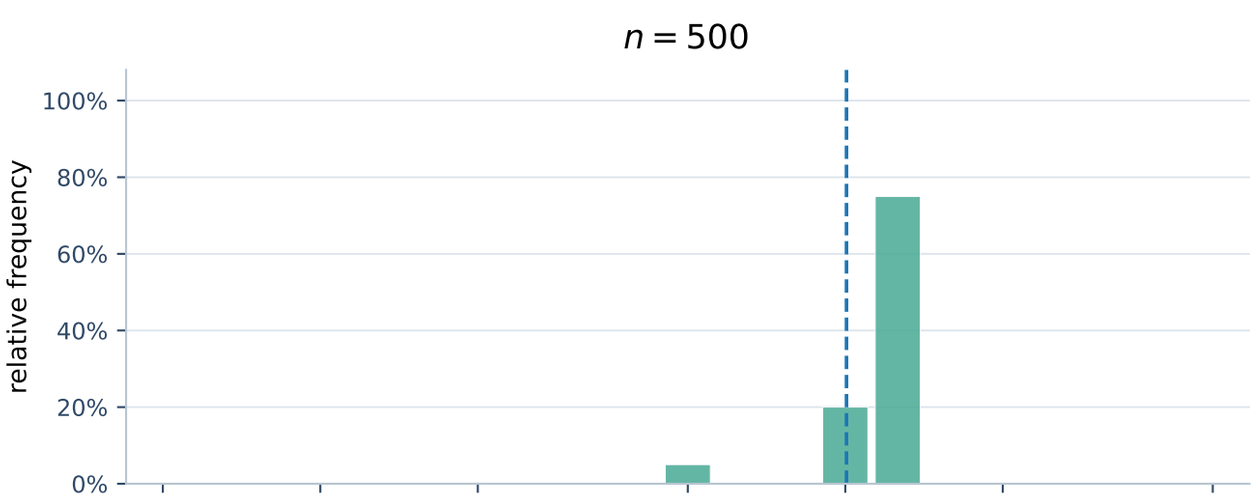
$n = 300$



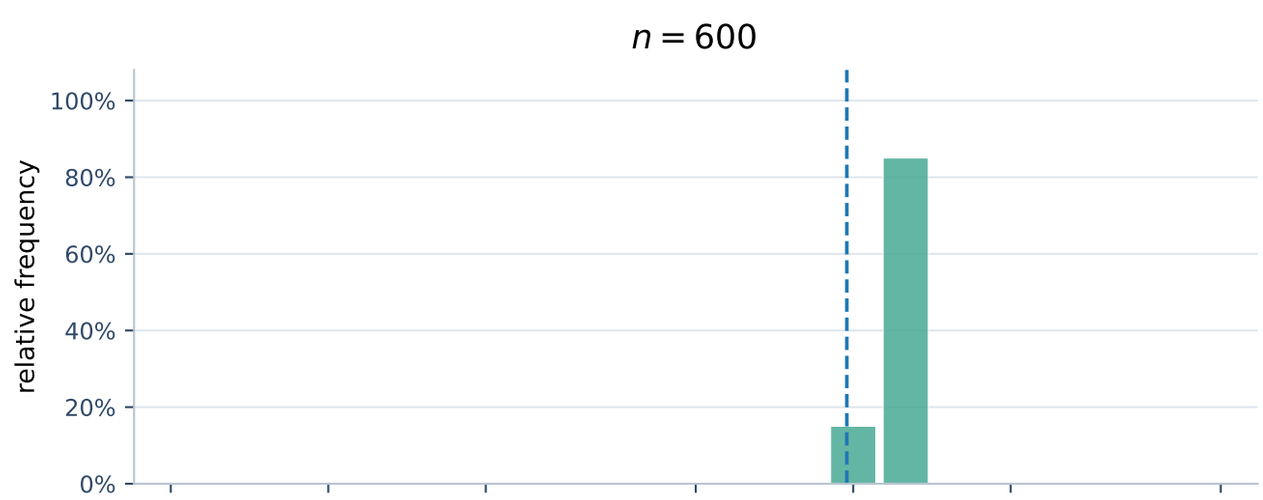
$n = 400$



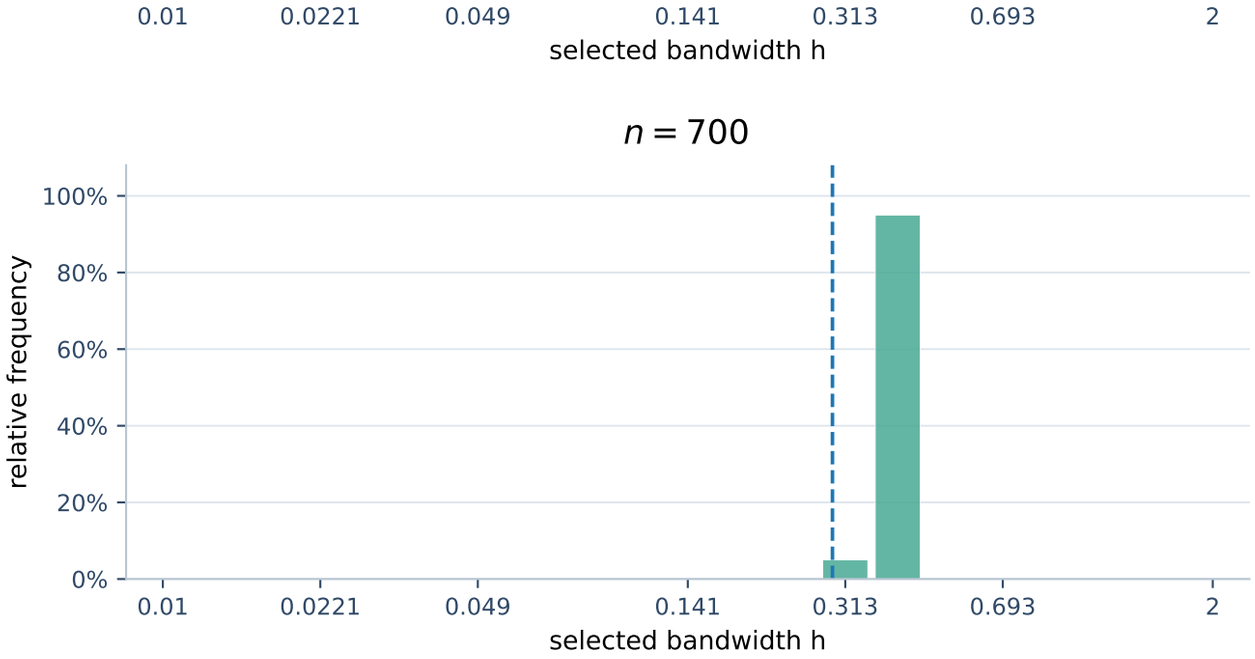
$n = 500$



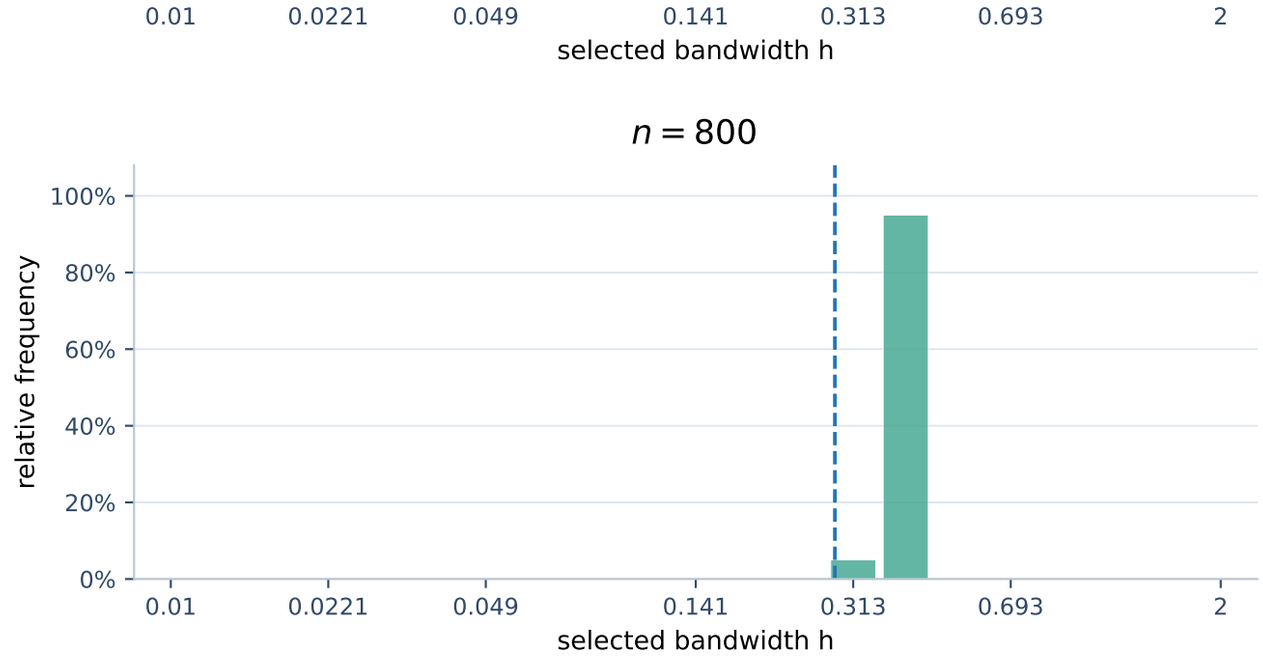
$n = 600$



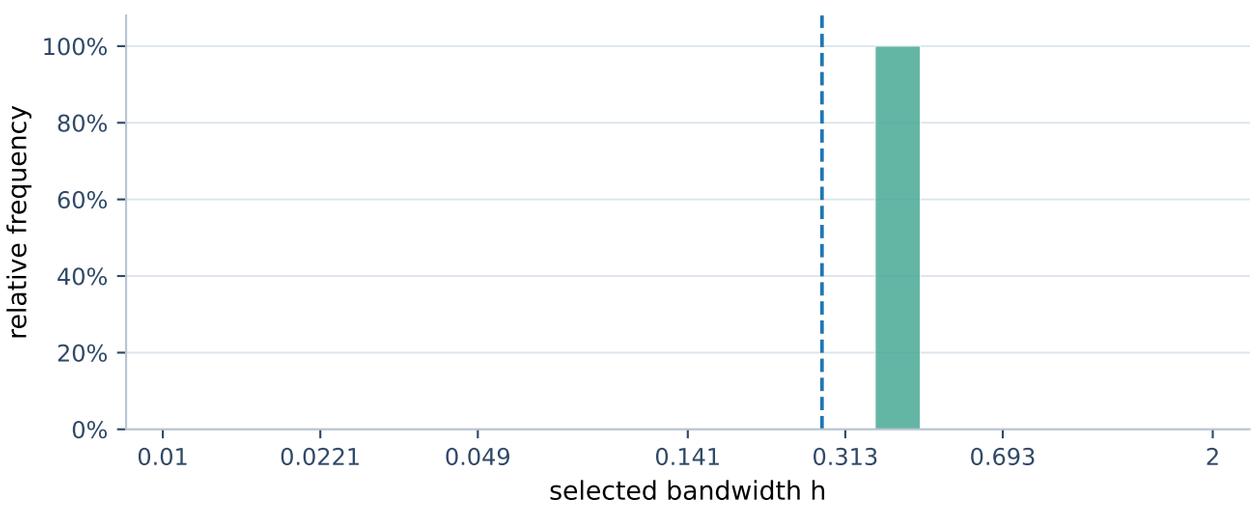
$n = 700$



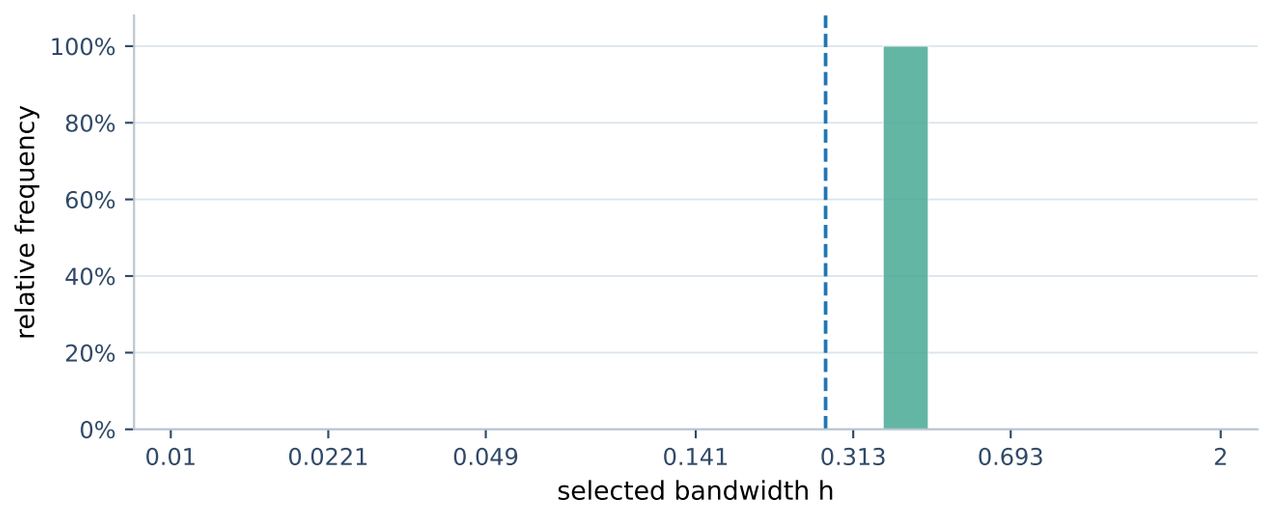
$n = 800$



$n = 900$



$n = 1000$



Gaussian MISE reference for each sample size
