AR(3) stationarity diagnostic and an exploratory restart | same fixed sample path
Stationarity detects this failure
Failed start
Zero-start control
Causal stability boundary
Spectral radius of best estimate
Evaluated iteration
An unstable initial estimate can recover
Random initialization seed 3
Spectral radius of best estimate
Evaluated iteration
Same total budget: 5000 evaluated states
No restart
Restart from zero coefficients at state 100
Best width minus global numerical reference
Cumulative evaluated states
